Installing iLife '06

Welcome

The iLife '06 software package gives you the most up-to-date versions of the iTunes, iPhoto, iMovie HD, iDVD, iWeb, and GarageBand applications. Follow the instructions on this card to install these applications and begin using Apple's acclaimed tools for creating, editing, organizing, and sharing your digital music, photos, and movies.

What You Need

To install your software, you'll need:

- Mac OS X version 10.3.9 or Mac OS X version 10.4.3 or later (10.4.4 or later required for using iChat recording in GarageBand, iPhoto Photocasts, and for iMovie HD themes)

Important: For optimum performance, update your system software to the latest version of Mac OS X. To make sure you have the latest version of Mac OS X, choose Apple (🍎) > System Preferences and click Software Update. Click Check Now to retrieve updates for your system. After you install an update, it's a good idea to click Check Now again to make sure you've received all the available updates. You must have a connection to the Internet to use Software Update.

- iTunes 6.0.2 or later and QuickTime 7.0.4 or later (both included)
- A Macintosh computer with a PowerPC G4, G5, or Intel Core processor and at least 256 megabytes (MB) of memory (512 MB or higher recommended)

Important: To use iDVD, you need a Macintosh computer with an Intel Core processor or a 733-MHz PowerPC G4 processor or higher. To use HD video in iMovie HD, you need a Macintosh computer with an Intel Core processor or a 1-GHz PowerPC G4 processor or higher with at least 512 MB of memory.

- A DVD drive

Important: To burn a disc using iDVD, you need a Macintosh computer with an Apple SuperDrive (DVD recordable) or a compatible third-party DVD burner.

- 10 gigabytes (GB) of available disk space to install the iLife '06 applications

Note: These are the minimum requirements for installing and using your software. However, some applications have additional requirements to take full advantage of their features. To see additional requirements, see the Read Before You Install document on the Install disc.

Installing iLife '06

To install the iLife software:

1. Insert the Install iLife '06 DVD into the drive.
2. Double-click the iLife '06 icon and follow the onscreen instructions.
3. If you want to install only some of the applications on the disc, click Customize in the Installation Type pane of the Installer. Select the items you want to install and then follow the onscreen instructions.

Registering Your Software

If you choose not to register your iLife software during installation, you can register on the web at www.apple.com/register/ilife.html, or choose Register from the application menu when any application is open.

Finding Answers and Instructions

- **Help for each application:** For detailed instructions on using iTunes, iPhoto, iMovie HD, iDVD, iWeb, and GarageBand, use the onscreen help available for each application. Choose Help > [Application Name] Help when the application is open.
- **Tutorials on the web:** To view multimedia tutorials on using all the iLife applications, go to www.apple.com/ilife/tutorials.
- **Apple Support:** If you have a question that's not addressed in the onscreen help, go to www.apple.com/support/ilife or choose Help > "Service and Support" when the application is open.
- **AppleCare:** To learn how to contact AppleCare in your country, go to www.apple.com/contact/phone_contacts.html. For more information about AppleCare service and support products, go to www.apple.com/support/products.
- **Product Information:** For general product information and updates, go to www.apple.com/ilife.
